Before You start the ansys You must set the ansys environment related to the right ansys sersion:

Ansys 2026 Release 1: `module purge; module load ansys/v2026r1`

Ansys 2025 Release 2: `module purge; module load ansys/v2025r2`

Ansys 2025 Release 1: `module purge; module load ansys/v2025r1`

Ansys 2024 Release 2: `module purge; module load ansys/v2024r2`

Ansys 2024 Release 1: `module purge; module load ansys/v2024r1`

You can start the ansys workbench gui with the following command: `wb`

You can start the ansys product with the command

Fluent	fluent
Ansys Electronic Desktop	ansysedt
CFX	cfx5
IcemCFD	icemcfd
Icepak	icepak
Optislang	optislang
RSMClusterConfig	rsmclusterconfig
Ansys Help System	anshelp

Hint 1:
Please check with `module list` if a specific ansys environment is already active!
Mostly the appropriate ansys version is set permanently in Your account.

Hint 2:
Please change between different ansys version only for testing purposes!

Hint 3:
Some Ansys Products (Dicovery, Spaceclaim, ...) are only available for Windows OS - not for Linux!

FAQ 1:
How can I activate the „Beta Option Menues“?
In the Workbench GUI please goto Tools » Options » Appearance. Scroll down and switch on the „Beta options“ checkbox.

FAQ 2:
How can I get my personal ansys student license?
Ansys for students
