You can start Comsol with the following short commands

Version 6.4: `comsol64`
Version 6.3: `comsol63`
Version 6.2: `comsol62`
Version 6.1: `comsol61`

You can start Your Comsol script (*.mph file) with the following generic command:
`comsol.batch inputfile.mph`

Hint: For the usage of this generic job script `comsol.batch inputfile.mph` You have to setup the **comsol enviroment permanently in Your account**!

If the comsol environment ist not (!) set permanently in Your Account please set the right comsol version in Your current terminal with the command: `module purge; module load comsol/v64`

Please check upcoming comsol events here: Comsol Events

note 1:
please avoid to use the CAD Import toolbox license:
Goto `Options » Preferences » Geometry » 3D geometry representation » In new geometries`
and change to `COMSOL kernel`
