

Handling of software environments with module comand

How can I list all available software environments?

module avail or module av

How can I list my software environments?

module list or module li

How can I list a specific software environments?

module avail matlab or module av matlab

module avail intel or module av intel

Load/Unload of software environments

How can I set (load) a specific software environments?

module load matlab/v2020b

module load intel/v2020

Hint: Please check with module av matlab for an existing environment!

How can I unset (unload) a specific software environments?

module unload matlab/v2020b

module unload intel/v2020

Hint: Please check with module av matlab for an existing environment!

How can I unload all (!) software environments: module purge

It is recommended to load only the necessary software environments in a terminal e.g.:

module purge; module load ansys/v2022r1

module purge; module load comsol/v60 matlab/v2020b
